FUND PERFORMANCE

The Sarasin Growth Managed Fund launched on 29 April 2025 and therefore does not yet have sufficient performance history to present. However, the investment approach, asset allocation, and management team are similar to those of Sarasin's longstanding Growth Model Portfolio strategy. If you would like access to the performance data for the Growth Model Portfolio, please contact sales@sarasin.co.uk.

Risk Profile

Lower risk Potentially lower reward **Higher risk** Potentially higher reward

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the Fund has performed in the past, you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time. The higher the rank the greater the potential reward but the greater the risk of losing money. The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically. The following risks may not be fully captured by the Indicator:

Derivatives risk: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.

Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.

Concentration risk: The fund holds a small number of investments, and therefore a decline in the value of a single investment may have a greater impact than if it held a larger number of investments.

Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.

Bond risk: In stressed conditions bonds may become harder to sell in a timely manner, resulting in unpredictable changes in the value of your holdings.

Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.

Alternatives risk: The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees. These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.

Exchange Traded Funds (ETFs) risk: ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.
