Sarasin Endowments Fund, a sub-fund of Sarasin Charity Authorised Investment Funds Class A Acc

ISIN:GB00BYZJN999

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund by 4% per year more than the Consumer Prices Index (CPI) over a rolling 5 year period after deducting fees and costs. This target is not guaranteed over any period of time and the Fund could lose value.

Investment Policy

We invest the Fund approximately as follows:

Shares: 70% in 60-100 companies listed on major stock exchanges around the world

Bonds: 15%. Up to 20% of the bonds we invest in can be rated higher risk by external ratings agencies but the majority are rated as 'investment grade'.

Real estate investments: 5%

Cash or Alternatives: 10%

The strategic asset mix of the Fund (as defined by the blended benchmark) sets out how the portfolio will be allocated in normal market conditions. However, the Fund is managed on an active basis and when there is a strong sentiment, positive or negative, on a particular asset class or classes, the Investment Manager will actively deviate away from this asset mix and the securities in the underlying indices to try to meet the investment objective.

We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries. We believe that these themes are likely to result in structural consequences for company performance which will be reflected in their share price. We select companies which are most likely to benefit from our investment themes, and are well placed to grow their revenues and cash flows as a result of them, based on our own analysis.

Integral to this analysis is an in-house tool devised to examine and quantify any material environmental, social and/or governance ("ESG") factors. A comprehensive assessment of the related risks and opportunities resulting from these factors are then embedded within our financial modelling and analysis of companies.

We undertake fundamental analysis on bond issuers, which includes an evaluation of risks that ESG factors pose. We implement an in-house scoring system which combines our assessment of the materiality of ESG risks associated with each industry sector with data on each bond issuer to generate an overall issuer-specific ESG rating and only invest in bonds whose issuer has an ESG rating above a pre-determined level.

We engage as far as possible with companies to promote actions to mitigate material ESG risks identified with priority given according to the materiality of our concern, the size of our holding, and also our view of the ability for engagement to have a meaningful impact.

Voting is integral to our engagement work and, where we are a shareholder, we seek to ensure our voting is aligned with our engagement priorities.

We avoid companies that are materially engaged in certain sectors, including the production of tobacco, alcohol, armaments, gambling and adult entertainment. Further detail on how we do this is available in the Guide to Ethical Exclusions on our website at www.sarasinandpartners.com.

Derivatives (financial instruments whose value is linked to the expected future price movements of an underlying asset) may be used to meet the Fund's investment objective. They may also be used to assist with the efficient management of the Fund with the aim of reducing risk or costs, managing currency exposures or generating additional capital or income.

The Fund's performance can be assessed by reference to a blended benchmark* of:

7.5% - ICE BoAML UK Gilts All-Stocks Index;

7.5% - ICE BoAML Sterling Corporate & Collateralised Index;

10% SONIA+2%;

10% - MSCI All Countries World Index 100% Hedged to GBP;

60% - MSCI All Countries World Index;

5% - IPD All Balanced Property Fund Index;

This represents a typical mix of assets held by the fund.

Distribution Policy

Any income due from your investment is reflected in the value of your units rather than being paid out. The fund may distribute capital as well as income.

Dealing Frequency

You can buy and sell units in the Fund before 12 noon GMT on any business day in London.

Recommendation

The Fund is only available for investment by UK Charities. This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest risk number does not mean risk free.

The Fund is ranked at 4 reflecting observed historical returns. The fund is in this category because it has shown moderate levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Bond risk: In stressed conditions bonds may become harder to sell in a timely manner, resulting in unpredictable changes in the value of your holdings.
- Emerging markets risk: Emerging markets may face more political, economic or structural challenges than developed markets. Shares may also be less liquid, meaning investments may not be sold quickly enough to prevent or minimize a loss. As a result, investing in emerging markets may involve a higher risk than investing in developed markets.
- Alternatives risk: The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees.

These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.

- Derivatives risk: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.
- Exchange Traded Funds (ETFs) risk: ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.
- Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.
- Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.
- Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.
- Further details of the risks that apply to the fund can be found in the fund's Prospectus.
