

**FUND AIM**

The Fund seeks to provide growth (through increases in investment value and income) in real terms over a rolling 5-year period, after fees, through investment in a range of asset classes including between 20-60% in shares of companies from around the world. To grow in real terms, the Fund must increase in value by more than the rate of inflation, as measured by the Consumer Prices Index.

## Risk Profile

**Lower risk**

Potentially lower reward

**Higher risk**

Potentially higher reward

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the Fund has performed in the past, you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time. The higher the rank the greater the potential reward but the greater the risk of losing money. The Fund is ranked at 4 reflecting observed historical returns. The fund is in this category because it has shown moderate levels of volatility historically. The following risks may not be fully captured by the Indicator:

**More than 35% of scheme property in securities issued by governments and public bodies:**

The fund may invest more than 35% in government or public securities issued by any single issuer listed in the Prospectus. Such exposure will be in line with the investment policy of the fund and in pursuit of the fund's objective. It is currently envisaged that the fund's exposure to such securities may be to those issued by the UK government, although this may vary and include securities issued by other governments and public issuers listed in the Prospectus.

**Derivatives risk:** Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.

**Operational risk:** Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.

**Counterparty and settlement risk:** The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.

**Bond risk:** In stressed conditions bonds may become harder to sell in a timely manner, resulting in unpredictable changes in the value of your holdings.

**Charges deducted from capital:** The fund has charges deducted from capital, which may reduce the potential for growth.

**Emerging markets risk:** Emerging markets may face more political, economic or structural challenges than developed markets. Shares may also be less liquid, meaning investments may not be sold quickly enough to prevent or minimize a loss. As a result, investing in emerging markets may involve a higher risk than investing in developed markets.

**Alternatives risk:** The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees. These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.

**Exchange Traded Funds (ETFs) risk:** ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.
