Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Sarasin Climate Active Endowments Fund, a sub-fund of Sarasin Charity Authorised Investment Funds Class A Income Units ISIN:GB00BFX4MW92

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund (through increases in investment value and income) by 4.0% per year more than the Consumer Prices Index (CPI) over a rolling 5 year period after deducting fees and costs. This target is not guaranteed over any period of time and the Fund could lose value.

Investment Policy

We invest the Fund approximately as follows:

- Shares: 70% in 60-100 companies listed on major stock exchanges around the world.
- Bonds: 15%. Up to 20% of the bonds we invest in can be rated higher risk by external ratings agencies but the majority are rated as 'investment grade'.
- Real estate investments: 5%
- Cash or Alternatives: 10%

Exposure to any of the above asset classes may be obtained through investment in funds (including funds managed by Sarasin). We also invest in derivatives and use them to increase performance and generate income, as well as manage investment risk and to gain cost-effective access to investments. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies). The strategic asset mix of the Fund (as defined by the blended benchmark) sets out how the portfolio will be allocated in normal market conditions. However, the Fund is managed on an active basis and when there is a strong sentiment, positive or negative, on a particular asset class or classes, the Investment Manager will actively deviate away from this asset mix and the securities in the underlying indices to try to meet the investment objective. The fund's investments can be from any country/region, sector or industry. Investments are selected to align with the goal of the Paris Climate Change Agreement to keep global temperature increases to well below 2 degrees Celsius above pre-industrial times. We avoid investment in companies which are materially engaged in certain sectors, including thermal coal, the extraction of fossil fuel from tar sands, tobacco, alcohol, armaments, gambling and adult entertainment.

We have an environmental, social & governance strategy. We consider which target investments are likely to benefit from a move towards a lower carbon economy and which may be harmed. We also look to engage with companies we invest in, particular those whose activities could significantly impact climate change. We may disinvest if we believe those companies are not sufficiently addressing the material risks of such a move. We use derivatives to adjust how sensitive the Fund is to changes in currencies - whether to act on opportunities or control risk. We usually aim for the Fund's exposure to Sterling to be the same as the blended benchmark* (around 60%). We use an income reserve to smooth the income we pay over time.

The Fund's performance can be assessed by reference to a blended benchmark* of:

- 7.5% - ICE BofAML UK Gilts All Stocks Index;
- 7.5% - ICE BofAML Sterling Corporate Bond Index;
- 20.0% - MSCI UK IMI;
- 10.0% - MSCI All Countries World Index ex UK (Local Currency);
- 40.0% - MSCI All Countries World Index ex UK;
- 5.0% - MSCI All Balanced Property Funds Index (One Quarter Lagged);
- 10.0% - Bank of England SONIA + 2%

This represents a typical mix of assets held by the fund.

Distribution Policy

Any income due from your investment may be paid out to you.

Dealing Frequency

You can buy and sell units in the Fund before 12 noon GMT on any business day in London.

Recommendation

The Fund is only available for investment by Charities. This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 4 reflecting observed historical returns. The fund is in this category because it has shown moderate levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Investing in bonds offers you the chance to earn returns through growing your capital and generating income. Nevertheless, there is a risk that the organisation which issued the bond will fail, which would result in a loss of income to the Fund, along with its initial investment. Bond values are likely to fall if interest rates rise.
- Fund Investment Liquidity Risk: This fund invests in other funds which have irregular dealing points and/or require advanced notice to be given in order to sell them. In stressed market conditions, it is possible that these other funds may become harder to sell at the last quoted price or within a short time period. Under such conditions, it is possible that there may be delays if you choose to redeem your holding in this Fund.
- Counterparty and Settlement Risk: The fund may enter into derivative transactions in over-the-counter markets, which will

expose the fund to the credit risk of their counterparties. The fund may be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the relevant contract. In the event of the bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the fund seeks to enforce its rights.

- Derivatives, which are linked to the rise and fall of other assets, may be used both to achieve the investment objective, and to simply reduce the risk or manage the Fund more efficiently. The price movements in these assets can result in larger movements of the Fund unit price.
- Market Risk: This is a general risk that the value of a particular derivative may change in a way which may be detrimental to the Funds' interests and the use of derivative techniques may not always be an effective means of, and sometimes could be counter-productive to, the Funds' investment objectives.
- Emerging Market Risk: Emerging markets may face more political, economic or structural challenges than developed markets and shares may be less liquid, meaning that investments may not be sold quickly enough to prevent or minimize a loss; they may therefore involve a higher risk than investing in developed markets.
- The fund has charges deducted from capital. This may reduce the potential for growth.
- Bond Liquidity Risk: In stressed market conditions the value of certain bond investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	No charge
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.	
Charges taken from the Fund over a year	
Ongoing charges	0.85%
