ISIN:GB00B7XS1T58

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund (through increases in investment value and income) over a rolling 5 year period after deducting fees and costs.

Investment Policy

We invest at least 80% of the Fund in the shares of UK companies.

We may also invest in cash or bonds or units in funds (including those managed by Sarasin).

The fund is actively managed. We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries, and will shape the world in which we live and invest. We select companies based on our own analysis of which are most likely to benefit from our themes, and are well placed to grow their revenues and cash flows as a result of them.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments.

Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

The Fund's performance can be assessed by reference to the MSCI UK IMI as it represents the performance of the shares of UK companies.

Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater

the risk of losing money.

The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Derivatives can only be used to manage the fund more efficiently in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income. Although this may not be achieved and may create losses greater than the cost of the derivative.
- The fund has charges deducted from capital. This may reduce the potential for growth.
