Sarasin Digital Opportunities, a sub-fund of Sarasin Funds ICVC Class L Income Units

ISIN:GB00BMZNCR80

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund (through increases in investment value and income) over a rolling 5 year period after deducting fees and costs.

Investment Policy

At least 80% of the Fund invests in companies which operate in digital sectors such as the digital infrastructure, communications and services sectors, with particular focus on smaller and medium sized companies, in any country or region, which we believe have greater potential for growth.

The Fund is actively managed and typically only invests in a relatively small number of companies (between 20 and 30) where there is a high level of conviction in the opportunity they offer.

As part of the investment process, we consider environmental, social and governance ("ESG") factors. We conduct extensive analysis for each company against ESG components such as carbon emissions, water use, board composition, audit practises and executive remuneration, as well as examining a company's impact on consumers, employees and the wider society.

The Fund invests mainly in the shares of companies, but may also hold up to 20% in cash to be able to react to investment opportunities.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments.

Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

The Fund's performance can be assessed by reference to MSCI All Countries World Index (Net) as this represents the performance of shares of companies from around the world and reflects the global nature of the Fund. It is therefore considered an appropriate performance comparator.

Distribution Policy

Any income due from your investment may be paid out to you.

Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London until 31.12.2021 or if the value of shares exceeds £150,000,000, whichever may occur first. After this point you will only be able to sell shares.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 6 reflecting observed historical returns. The fund is in this category because it has shown very high levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Counterparty and Settlement Risk: The fund may enter into derivative transactions in over-the-counter markets, which will expose the fund to the credit risk of their counterparties. The fund may be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the relevant contract. In the event of the bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the fund seeks to enforce its rights.
- Derivatives can only be used to manage the fund more efficiently in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income. Although this may not be achieved and may create losses greater than the cost of the derivative.
- Emerging Market Risk: Emerging markets may face more political, economic or structural challenges than developed markets and shares may be less liquid, meaning that investments may not be sold quickly enough to prevent or minimize a loss; they may therefore involve a higher risk than investing in developed markets.
- The fund has charges deducted from capital. This may reduce the potential for growth.
- Smaller company shares can be riskier as they may be more difficult to buy and sell and their share price may fluctuate more than that of larger companies
- Concentration Risk: Investing in a concentrated portfolio of stocks will tend to expose the strategy to greater fluctuations in the prices of stocks within the portfolio than a strategy spread across a large number of stocks, and will therefore carry more risk.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	No charge
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.	
Charges taken from the Fund over a year	
Ongoing charges	0.71%
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

The ongoing charges figure is based on estimated expenses for the year ending 31.12.2019. This figure may vary from year to year. It excludes: portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling in another fund.

For more information about charges, please refer to the relevant sections of the Prospectus available at www.sarasinandpartners.com
