Inception of model: 11.09.13. Past performance is not a guide to future performance. Performance is net of DFM fee & net of the cost of the underlying positions. The effect of commissions, fees and charges will impact the portfolio's performance. IA sector performance is shown net of fees

¹Prior to 31.12.2018 the portfolio benchmark was a composite benchmark.

MANAGER COMMENTS FOR MPS RANGE

The portfolio's holding in the Fidelity Index US Fund was the best performer. The fund benefited from a strong US market, particularly the outperformance of companies involved in AI. The Sarasin Thematic Global Equity (GBP Hedged) Fund was another positive contributor to performance. Its holding in advanced microchip designer Nvidia was the main highlight thanks to AI-related demand for the company's products.

In a reversal of its strong showing in the final quarter of 2023, the portfolio's holding in the Vanguard UK Government Bond Fund was the main detractor. It had benefited from December's rally in government bonds and expectations that interest rates would fall in 2024. The Sarasin Responsible Corporate Bond Fund also held back performance despite outperforming its benchmark during the period.

We added to the portfolio's holding in the Fidelity Index US Fund as US stock markets continued to performed very well.

We took an initial position in the Sarasin Global Dividend Fund, which uses a thematic approach to investing in high-quality companies that are likely to increase their dividends.

We sold the portfolio's holding in the Royal London Short Duration Gilts Fund to increase the duration of the portfolio to benefit from any cuts in interest rates.

The portfolio's holding in the Fidelity Pacific Fund was reduced given our concerns around the Chinese economy.

AN OVERVIEW
