What is this product?

Type

This is an investment fund established as an Open-Ended Unit Trust.

Objectives

Investment objective The Fund seeks to achieve long-term capital growth through investment in the shares of global real estate companies and global real estate investment trusts.

Investment policies The Fund invests mainly in Real Estate Investment Trusts, and company shares from around the world, which are linked to the property market and may also invest in other closed-ended property related funds.

The Fund will hold mainly the shares of large or medium sized companies, but from time to time may invest in smaller companies. These companies will earn income from letting properties or land.

The Trust will assess and score the environmental, social and governance profile of each investee entity in the real estate sector, on the basis of their climate strategy, use of building materials, the ecological efficiency of its operations, and their management of biodiversity, using a variety of quantitative data inputs. Only those in the top 50% in this scoring, therefore considered to have an above average ESG profile relative to others in the real estate sector, will be considered eligible for the Trust to invest in.

Derivatives (financial instruments whose value is linked to the expected future price movements of an underlying asset) may be used only with the aim of reducing risk or costs, or generating additional capital or income.

Benchmark The Fund is actively managed and will not track an index.

Redemption and Dealing You can buy and sell units in the Fund before 12 noon GMT on any business day in Dublin.

Distribution Policy Any income due from your investment is reflected in the value of your units rather than being paid out.

Launch date The Fund was launched on 06/12/2004. The Unit Class was launched on 15/10/2012.

Fund Currency The base currency of the Fund is GBP.

Conversion of units/shares You are entitled to switch from one unit class to another, provided that you meet the criteria for that unit class. Details of how to do this are contained in the Prospectus and the relevant Supplement.

Asset Segregation The assets and the liabilities of each sub-fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.sarasinandpartners.com.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 October 2018 and 31 October 2023.

Moderate: this type of scenario occurred for an investment between 28 February 2018 and 28 February 2023.

Favourable: this type of scenario occurred for an investment between 30 January 2015 and 31 January 2020.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 GBP is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	104 GBP	585 GBP
Annual cost impact*	1.0%	1.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and 1.3% after costs.
