SARASIN

SARASIN IE THEMATIC GLOBAL REAL ESTATE EQUITY P ACC

Factsheet | 31 January 2026

FUND AIM

The Fund seeks to provide long-term growth through investment in the shares of global real estate companies and global real estate investment trusts, which have an above average ESG profile when compared to other issuers in the global real estate sector. The fund is actively managed. The comparator benchmark for the fund is referenced in the Fund Information section below. It has been selected because the Investment Manager and the Manager believe that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. However the Investment Manager has discretion to deviate from the benchmark's constituents and weightings, subject to the fund's investment objective, policy and internal risk guidelines. While the benchmark index is used as a performance comparison, portfolio construction is not constrained by it, and holdings may differ materially from those of the benchmark.

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the Fund has performed in the past, you should note that the Fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time. The higher the rank the greater the potential reward but the greater the risk of losing money. The Fund is ranked at 6 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically. The following risks may not be fully captured by the Indicator:

Derivatives risk: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.

Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.

Concentration risk: The fund holds a small number of investments, and therefore a decline in the value of a single investment may have a greater impact than if it held a larger number of investments.

Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.

Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.

Small cap equities risk: Shares of smaller companies can be riskier, as they may be more difficult to buy and sell, and their prices may fluctuate more than those of larger companies.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.
