WHY MIGHT CLIMATE ACTIVE SUIT YOU?

In 2015 the world set itself a target to keep temperature increases to well below 2°C – and ideally to 1.5°C – above pre-industrial levels. Ten years on from the signing of the Paris Climate Agreement, it is time to take stock.

Far from seeing greenhouse gas emissions fall, necessary to deliver a stable climate, planet-warming gases continue to accumulate at a steady pace in the Earth's atmosphere. Time is running out for action. According to scientists, the world surpassed an average temperature increase of 1.5°C in 2024 and remains on track for reaching between 1.9°C and 3.7°C by 2100¹.

The Sarasin & Partners Climate Active Strategy is designed for investors who seek to promote alignment with the goals of the Paris Agreement, whilst delivering income and capital appreciation. It aims to do this by integrating climate-related financial risks into investment analysis, and engaging in proactive company and policy outreach to drive decarbonisation in the real world.

CHARITIES CAN ACCESS THE STRATEGY IN ONE OF TWO WAYS

- 1 Through the Sarasin Climate Active Endowments fund, a diversified global multi-asset portfolio designed to achieve a total return of CPI +4% per annum over a rolling five-year period after deducting fees and costs.
- 2 A segregated portfolio, typically where trustees wish to allocate to equities, or require additional ethical exclusions.

STRATEGY ASSETS

Since launch
Feb 2018

via a combination of pooled and segregated mandates, the strategy has gathered over

£1.1BN

As at 31.12.24

¹ <https://climate.copernicus.eu/copernicus-2024-first-year-exceed-15degc-above-pre-industrial-level>; <https://www.newscientist.com/article/2465472-the-world-is-on-track-for-between-1-9-and-3-7c-of-warming-by-2100/>

A PARIS-ALIGNED APPROACH

The objective of our Climate Active Strategy is to achieve long-term capital and income growth of CPI +4% per annum, measured over a rolling 5-year period (after fees). The strategy aims to do this while promoting alignment with the goals of the Paris Climate Agreement.

Our approach is rooted in the following beliefs:

- Climate change is likely to happen more quickly than consensus expects.
- Technological advances will drive accelerating decarbonisation but the roll out will be resisted, and potentially impeded, by vested interests.
- Supportive government policy is important to enable a rapid system-wide transition to low carbon value chains.

Alongside the integration of climate considerations into investment analysis and decision-making, a key feature of our Climate Active strategy is its focus on reducing real-world emissions through rigorous engagement with companies, policy-makers and other key market actors to drive change.

The strategy is, therefore, distinct to investment solutions that prioritise divestment of carbon-intensive holdings as a means to lower portfolio emissions as we do not believe this will necessarily help to lower real-world emissions. However, to be clear, we do avoid carbon-intensive holdings that offer little potential to transition, and capital invested in these entities is at risk. We furthermore offer clients the choice to invest in a fossil fuel free version of Climate Active (see below under ethical exclusions).

Our criteria for determining which investments are Paris-aligned are summarised in the box below:

Our framework (referred to as our Net Zero Alignment Assessment) is informed by the Oxford Martin School 'Principles for Climate-Conscious Investment'² as well as investment industry tools, such as the Net Zero Investor Framework³.

We expect companies to:

- Commit to align the business with a temperature pathway consistent with the Paris goals (i.e. well below 2°C and ideally 1.5°C), covering emissions associated with entities' direct operations, supply chain and products sold (i.e. scopes 1, 2 and 3 emissions);
- Set science-based mid-term targets to enable verification of progress towards net-zero emissions;
- Detail a credible strategy and capital expenditure plan for delivering the commitments;
- Transparent reporting of governance, progress against targets, lobbying and accounting for any material financial consequences.

Further information on our approach to engagement can be found in section: Company Engagement in more detail.

entities are ill-suited to transition, and this puts long-term capital at risk, we will not invest.

COMPANIES MUST BE PART OF THE SOLUTION

While Governments and technological change create the environment to enable decarbonisation, it is companies that will be the principal vehicles for transitioning to a low-carbon economy.

There is a deeply entrenched relationship between the economy and the use of fossil fuels. We need to consider not just the companies that produce fossil fuels, but all those that consume fossil-fuel based energy, partake in activities that emit greenhouses gases (such as cement production or steel making), or the funders of these activities. Ultimately, the climate crisis needs to be tackled through a system-wide pivot towards lower-carbon technologies.

At the same time, companies will face changing market dynamics as they adapt to the physical consequences of climate change. This will be felt in multifaceted ways, whether through impacts on resource inputs, labour productivity, supply chains, the integrity of property and infrastructure, or shifts in demand profiles. A failure to adapt early could result in costly disruption of goods and services that people depend upon.

To deliver sustained shareholder value, most companies will need to adjust their strategies in some way; and some quite profoundly. We aim to hold management and Boards to account for building resilience to, and supporting, the climate transition.

WHAT MAKES CLIMATE ACTIVE DIFFERENT

Our Climate Active strategy seeks broad economic exposure, rather than avoiding carbon-intensive sectors⁴. It aims to deliver its financial objectives by combining climate-aware investing with engagement, as follows:

- **Climate-aware Investment analysis:** We combine a top-down thematic investment process with detailed bottom-up analysis of company prospects:
 - Our top-down approach incorporates climate change as a core mega-theme alongside other societal trends such as digitalisation, automation, ageing, evolving consumption and security. Within the climate change theme, we look for companies that are positively exposed to the climate transition, as well as those that have the potential to pivot.
 - Our bottom-up analysis incorporates in-house climate risk analysis (including a Net Zero Alignment Assessments and quantitative Climate Value at Risk calculations) to evaluate how companies will be impacted by the energy transition, as well as the physical consequences of climate change. This work supplements our Sustainability Impact Matrix (SIM) – an in-house tool to examine material environmental, social and/or governance factors. Where we believe

- **Proactive engagement:** We engage with companies and other influential stakeholders to mitigate the harmful consequences of climate change. We recognise the complexity of system-change and seek to prioritise engagement with those entities that would most materially contribute to a transition to a low-carbon pathway, both through their own operations, or the ripple effect they can exert over the broader market.
- **Commitment to escalate:** We employ a range of engagement tools such as building coalitions with other investors; action at companies' Annual General Meetings and other public outreach to deliver a change in behavior. Where companies fail to respond to our engagement in a meaningful way within three years, we will review our position.
- **Opportunity for clients to add their voice:** Where the opportunity arises to facilitate interested underlying investors to add their name to public statements or engagement letters, we seek to facilitate this.
- **Transparent reporting on actions and outcomes:** We are committed to keeping underlying investors informed of engagement actions and voting we undertake on their behalf, and the key outcomes from those engagements through quarterly and annual reporting.

MULTI-ASSET WITH AN ETHICAL OVERLAY

Sarasin & Partners applies its Climate Active approach across equities, bonds and alternative assets.

In addition to the embedded climate active principles, the Sarasin Climate Active Endowments CAIFs also avoid investment in companies that are materially engaged in controversial sectors, including thermal coal, the extraction of fossil fuel from tar sands, tobacco, alcohol, armaments, gambling, predatory lending and adult entertainment.

In 2024, we launched the Sarasin Climate Active Endowments Ex-Energy CAIF which excludes the Oil and Gas Sector⁵.

Where clients want to follow their own ethical investment policy, we are happy to discuss how these can be integrated into a bespoke, segregated portfolio.

² Original principles published in 2015, with revised principles published in 2018: <https://www.oxfordmartin.ox.ac.uk/publications/oxford-martin-principles-for-climate-conscious-investment>

³ <https://www.iigcc.org/net-zero-investment-framework>

⁴ Other than those sectors or companies excluded due to ethical restrictions, or our assessment that capital is at risk (see below).

⁵ According to the Global Industry Classification Standard, the energy sector comprises companies engaged in exploration and production, refining and marketing, as well as storage and transportation of oil and gas, as well as coal and consumable fuels. It also includes companies that offer oil and gas equipment and services.

GOVERNANCE AND OVERSIGHT

We have two bodies that help direct our work and hold us to account. The CAIF Advisory Committee has oversight powers as permitted under the Charity Authorised Investment Fund (CAIF) structure. The Climate Advisory Panel has no oversight responsibility, but informs / advises the team on how it integrates climate risks into investment decision-making, our engagement work and policy outreach.

THE CAIF ADVISORY COMMITTEE

Structured as a CAIF*, charities investing via the fund not only benefit from simple administration and efficient implementation, but also from the added oversight of the CAIF Advisory Committee. The Committee meets with Sarasin & Partners four times a year. Its role is to review and challenge the Fund's activities on behalf of the underlying unit holders. The Committee also attends the Climate Advisory Panel meetings.

CHRIS STEPHENS (CHAIR)

Chris brings a range of experience from Business, Government and the NGO sector. He was the Global Human Resource of Exel, now DHL, as well as a Non Executive Director of OCS, a Facilities Management company, and WSP, an engineering consultancy business. In Government he was successively a Civil Service Commissioner, a member of the Senior Salaries Review Board and Chairman of the Judicial Appointments Commission. In the NGO sector, he chaired Traidcraft and was a trustee of Power to Change. He was awarded a CBE in 2016 for services to the Judiciary.

CAMILLA RITCHIE

Camilla has advisory roles with Sarasin and the Rayne Foundation, drawing on her experience of managing sustainable investments at 7IM and elsewhere. She also has a keen interest in stewardship and governance having been responsible for producing the 7IM stewardship report and being a director of 7IM's Dublin based multi manager funds. In her spare time she is chairman of the Wiltshire Gardens Trust charity.

KATIE BLACKLOCK

Katie is a former fund manager who spent 15 years investing in emerging markets. She was a founding partner of the London based hedge fund Nevsky Capital and continues to be involved in financial markets through her non-executive roles at Edmond de Rothschild, a European Financial services group that specialises in private banking and asset management. She is also a member of M&G Plc's With Profits Committee and is a trustee of NatWest Cushon's DC Master Trust. Katie is a Governor of The Health Foundation and chair of the Investment Committee which oversees the £1.2bn endowment.

*CAIF: Charity Authorised Investment Fund, an FCA regulated UCITS fund, designed for charities

THE CLIMATE ADVISORY PANEL

We created a Climate Advisory Panel to help us consider all matters related to investing against a backdrop of climate change and the need for the world to decarbonise. The panel meets four times a year, supplemented by informal communications between meetings, to discuss strategy and ongoing engagements with companies, policy-makers, regulators and other key market actors.

HEIDI HELLMANN

Heidi has more than 30 years' experience working in the energy sector. She is currently on the board of the Port of Inverness and the Notting Dale Heat Network. She began her career working as an offshore engineer in the oil & gas sector in the Gulf of Mexico and Norwegian North Sea before taking a break to get an MBA in Finance and Multinational Management from The Wharton School, University of Pennsylvania. Following three years at Enron, Heidi joined Royal Dutch Shell, where she worked in a range of commercial and strategy positions. From Shell, Heidi moved to BG Group, where she was Head of Group Strategy, following which she became Head of Group Strategy and Environment for Centrica Plc. In addition to her MBA from The Wharton School, Heidi has a degree from Stanford University in Petroleum Engineering and is currently pursuing a Masters' in Climate Change Policy at King's College London.

PROFESSOR CAMERON HEPBURN

Cameron is an economist with expertise in energy, resources and the environment. He is the Battcock Professor of environmental economics at the University of Oxford, based at the Smith School and the Institute for New Economic Thinking at the Oxford Martin School, and is Senior Research Fellow at New College, Oxford.

He has degrees in Law and Engineering, a doctorate in Economics, and many peer-reviewed publications in economics, public policy, law, engineering, philosophy, and biology. He has provided advice on energy and environmental policy to governments and international institutions around the world. He has also had an entrepreneurial career, co-founding three successful businesses and investing in several other start-ups.

LOUISE ROUSE

Louise is a consultant helping non-profit organisations design and implement engagement strategies with global financial institutions, regulators, and policymakers on a range of environmental and social issues. Louise has worked with groups including Amnesty International UK, Bank Fwd, BankTrack, Ekö, Global Witness, Greenpeace, and WWF-UK. Louise was previously the director of campaigns and engagement at ShareAction and before that worked for several years as a finance lawyer advising many of Ireland's leading financial institutions.

RT HON CHRIS SKIDMORE OBE

Chris was the UK Energy Minister (attending Cabinet) responsible for signing the UK's net zero commitment into law - the first G7 country to do so. He also helped secure the UK's Presidency of COP26. In 2022, Chris was appointed by the UK Government to chair the Net Zero Review, publishing the widely-acclaimed Mission Zero report in January 2023, which was described by Lord Nicholas Stern as 'a remarkable and important piece of work' (Mission Zero | Biteback Publishing). The Net Zero Review was the largest engagement exercise on net zero in the UK, engaging with over 2,800 businesses. For his work, in 2023, Chris was awarded Politician of the Year at the UK Green Business Awards, and Political Figure of the Year at the British Renewable Energy Awards 2023.

MILES ROBERTS

Miles was Group Chief Executive of the FTSE-listed global packaging company DS Smith plc for 13 years before retiring in 2025. Miles led the executive management of the Group overseeing overall ESG performance and was credited with driving the integration of sustainability into the core of the company's strategy. He chaired the Group's Health, Safety, Environment and Sustainability Committee.

Miles is currently a Non-Executive Director of Land Securities Group PLC. Following his early career in engineering, Miles became a Chartered Accountant. He was previously Chief Executive of McBride plc, having originally joined as its Group Finance Director.

KEY INFORMATION - SARASIN CLIMATE ACTIVE ENDOWMENTS STRATEGY

The Sarasin Climate Active Strategy is available as a multi-asset or single-asset portfolio, designed for charity investors who are seeking attractive and sustainable investment returns while investing in a way that is aligned with the Paris Climate Agreement, keeping temperature increases well below 2°C, and ideally 1.5°C, above pre-industrial levels. The fund focuses on real-world emission reduction, achieved through active engagement to promote alignment with the Paris goals.

OBJECTIVES & APPROACH

INVESTMENT OBJECTIVE

To achieve long-term capital growth. This is defined as being a total return target of inflation (CPI) + 4.0% per annum over a rolling 5-year basis (after fees).

PERFORMANCE ASSESSMENT

The strategy will seek to outperform a bespoke, index-based benchmark and peer group (ARC Steady Growth)

INVESTMENT SELECTION

The strategy combines a thematic investment approach with an emphasis on promoting alignment with the goal of the Paris Agreement.

MULTI-ASSET RISK AND RETURN FEATURES

The strategic asset allocation and tactical operating parameters are set out below:

ASSET CLASS	STRATEGIC ASSET ALLOCATION (%)	RANGES (%)
Bonds	15.0	5 - 35
Equities	70.0	60 - 80
Alternatives	15.0	0 - 30
Total	100.0	
Sterling Weighting	40.0	30 - 60

Projected returns	Income yield	2.3
	Trend annual return	6.8
	Trend annual 'real' return	4.4
Key risk metrics	Maximum annual drawdown*	-24.6
	5% Value at Risk (VaR)*	-9.3
	Annualised volatility*	9.8

Forecasts are not a reliable indicator of future performance and may differ to actual performance achieved.

Source: Sarasin & Partners LLP as at 31.12.24. Updated annually.

*Data since 31.12.05. VaR is the statistical measure of 'minimum' anticipated loss over a given period. As at 31.12.24, a 95% 1-year VaR of -9.3 means that you could expect to lose at least 9.3% one in 20 years (5% of the time).

ACTIVE MANAGEMENT

In normal market conditions, the fund will be allocated as per the strategic asset allocation. However, the fund is actively managed, taking into account a range of factors including material climate risks associated with moving onto a Paris-aligned pathway.

When the Investment Manager identifies positive or negative drivers for a particular asset class, they will actively deviate away from the strategic asset allocation to meet the fund's performance objectives. The fund focuses on active engagement, with fund holdings, to promote alignment with the Paris Climate Accord.

● The fund will invest in three categories of companies:

- 1 Climate-positive investments; which we expect to succeed in a 1.5°C-aligned world. These companies focus on offering solutions to climate challenges.
- 2 Climate transformers; the potential climate transition leaders operating in high-carbon supply chains. Their decarbonisation is vital to delivering the Paris Agreement goals. These are the companies we target for more detailed climate analysis and engagement.
- 3 Climate-neutral investments; where climate risks and opportunities are less material, but have attractive thematic factors.

PORTFOLIO CONSTRUCTION

Sarasin & Partners will seek to allocate capital by conviction, while incorporating sufficient diversification within and across asset classes, regions, themes and industry to spread risk efficiently. We would expect to own:

- Bonds; Gilts and Investment Grade Credit.
- Global equities;
- Property and alternative assets; predominantly accessed via specialist third party funds.

ETHICAL EXCLUSIONS

The fund will exclude investment in the following:

- No investment in companies with 5% or more of their turnover involved in the mining of thermal coal or tar sands.
- No investment in companies in the energy sector⁶.
- No investment in bonds issued by companies involved in fossil fuel extraction.
- Qualitative judgments to be considered on a regular basis by the Climate Active Advisory Panel.
- No investment in companies that generate significant turnover from manufacturing of tobacco related products, armaments, alcohol, gambling, adult entertainment and predatory lending.

DERIVATIVES

The fund uses derivatives for investment purposes and is not limited to their use for Efficient Portfolio Management only. However, the fund does not permit market exposure of above 100%.

CURRENCY HEDGING STRATEGY

The fund hedges non-sterling currency exposure back to the benchmark weighting (40%) in sterling. However, the Investment Manager may tactically use more or less hedging. Cross currency hedging is not permissible.

⁶ According to the Global Industry Classification Standard, the energy sector comprises companies engaged in exploration and production, refining and marketing, as well as storage and transportation of oil and gas, as well as coal and consumable fuels. It also includes companies that offer oil and gas equipment and services.

PERFORMANCE

ARC Charity Indices are based on historical information and past performance is not a reliable indicator of future results and may not be repeated. Asset Risk Consultants Limited (ARC) is an independent investment consultancy specialising in the analysis of private client and charity investment portfolio performance. Circa 30 investment houses supply ARC with performance data across their entire charity base. Portfolios falling into the Steady Growth risk category will have exhibited a historical variability of returns in the region of between 60 - 80% of UK equity markets. Portfolios in this category usually have a significant allocation to equities (in excess of 50%) but also have material exposure to a range of other asset classes.

COMPANY ENGAGEMENT IN MORE DETAIL

We take great care in our approach to company engagement.

Where it makes sense to work collaboratively with other long-term investors we will seek to build alliances to increase the pressure and ensure our voice is heard.

Our engagements with companies are based on an assessment of long-term shareholder returns, taking climate-related risks into account. This assessment is

holistic, incorporating scientific data on climate change, emerging regulation and technological advances.

Our approach to engagements are supportive of those taking action, but challenges inaction.

Further information on our approach can be found on our [website](#) and in our [Ownership Discipline](#) and latest [Stewardship Report](#).

KEY FEATURES OF OUR APPROACH

PRIORITISATION

Engagements are strictly prioritised to ensure we target companies that 1) would most materially contribute to a transition to a low-carbon pathway, both through their own operations, or the ripple effect they can exert over the broader market; 2) where there are core strategic misalignments with the Paris goals; and 3) where we believe we can effect change.

THOROUGH ANALYSIS

We aim to present a well-researched and compelling case for change. This gives us the best opportunity to gain traction with the broader shareholder base and the board of directors. The focus is on capital allocation and strategy, but we also consider operational matters. Our input aims to point to emerging problems from a long-term shareholder perspective, taking climate risks into account.

CLEAR AND ACHIEVABLE TARGETS

We press boards to set transparent and specific targets, e.g. operational targets to minimise emissions, capital expenditure plans that take account of a lower-carbon world or dividend policy to return cash to shareholders where suitable investment opportunities do not exist.

ESCALATING PRESSURE ON THE BOARD

We always seek a constructive dialogue with Boards. Initially we hold private conversations setting out our concerns. Where appropriate, we will reach out to

other large and/or concerned shareholders to explore joint action. Where private engagement fails to gain sufficient traction, we may look to increase pressure on the board through: publicly disclosing our concerns and calling for change; using our votes at Annual General Meetings; reporting breaches of director duties, or rules governing company reporting; filing shareholder resolutions or in extreme cases, putting forward director candidates.

WINNING THE ARGUMENT

We may make our case public to help raise awareness of risks to shareholder capital. Additional leverage is gained by building a network of supportive thought leaders in the business and policy worlds. Wherever appropriate, we seek to act in conjunction with our underlying investors to bring more voices to the debate.

KEY RISKS - SARASIN CLIMATE ACTIVE ENDOWMENTS STRATEGY

Bond risk: In stressed conditions bonds may become harder to sell in a timely manner, resulting in unpredictable changes in the value of your holdings.

Emerging markets risk: Emerging markets may face more political, economic or structural challenges than developed markets. Shares may also be less liquid, meaning investments may not be sold quickly enough to prevent or minimize a loss. As a result, investing in emerging markets may involve a higher risk than investing in developed markets.

Alternatives risk: The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees. These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.

Derivatives risk: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.

Exchange Traded Funds (ETFs) risk: ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.

Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.

Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.

Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.

Further details of the risks that apply to the fund can be found in the fund's Prospectus.

ABOUT SARASIN & PARTNERS

We are a specialist asset manager, trusted to invest £18.5 billion* on behalf of charities, private clients, institutions and intermediaries from the UK and around the world. The group manages £9.1* billion on behalf of charities and other not-for-profit organisations and currently employs over 260* people.

As long-standing providers of multi-asset investment solutions, our diverse, experienced team stretches from global analysts and economists to risk experts, all sharing knowledge and ideas on a daily basis. We are passionate about what we do, and focus exclusively on

delivering strong, long-term investment performance and exceptional client service.

Using our history of investment expertise and innovation, we seek the most suitable businesses for long-term investment, taking seriously our role as stewards of our clients' assets.

We operate as a partnership, with local management owning 40% of the voting interest. The remainder is owned by Bank J. Safra Sarasin. The Group in total has assets under management in excess of £197.5 billion.**
