

Sarasin IE Global Equity Opportunities (GBP) (the Trust)

Supplement to the Prospectus dated 21 July 2025

This Supplement contains specific information in relation to the Sarasin IE Global Equity Opportunities (GBP) (the **Trust**) an open-ended investment unit trust governed by the laws of Ireland and authorised by the Central Bank of Ireland (the **Central Bank**).

This Supplement forms part of and should be read in conjunction with the Prospectus dated 21 July 2025.

The Directors of the Manager, whose names appear under the section entitled “**Directors of the Manager**” in the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Dated: 21 July 2025

1. INVESTMENT OBJECTIVE, POLICIES AND STRATEGIES

Investment Objective

The investment objective of the Trust is to seek long term growth.

Investment Policy

The Trust will seek to achieve its investment objective through investment in a broad portfolio of international equity securities using a combination of top down and bottom up analysis to seek to identify the best themed stocks and hold them in the portfolio to add long term value. There will be no inherent bias towards the securities of any one country or region and the Investment Manager will be free to allocate funds to whichever markets it considers hold the best long term investment opportunities. While it is intended that the Trust will primarily invest in equities issued by large capitalised companies (generally with a capitalisation over \$10 billion) and medium capitalised companies (generally with a capitalisation of between \$2-10 billion), it may from time to time also invest in equities issued by smaller capitalised companies (generally with a capitalisation less than \$2 billion) where the Investment Manager considers they hold particular growth opportunities.

The Trust may also employ financial derivative instruments (**FDIs**), including futures, forward contracts, options and swaps for efficient portfolio management. The use of such instruments is more particularly described under the headings **Efficient Portfolio Management and Financial Derivative Instruments** below and in the Prospectus and will at all times be in accordance with the conditions and limits laid down by the Central Bank from time to time.

Repurchase and reverse repurchase transactions are permitted subject to the conditions and within the limits set out in the Central Bank UCITS Regulations for efficient portfolio management purposes only. It is not anticipated that the Trust will be leveraged as a result of such transactions. Any revenues arising from repurchase and reverse repurchase agreements will, after deduction of any expenses and fees, be returned to the Fund. These direct and indirect operational costs will not contain any hidden revenue.

The Trust may also invest in other collective investment schemes, subject to the Investment Restrictions as set out in the Prospectus and in accordance with its investment objective in order to maintain a fully invested position while at the same time accommodating liquidity requirements.

The Trust may also hold and invest in ancillary liquid assets such as bank deposits, fixed or floating rate instruments including but not limited to commercial paper, floating rate notes, certificates of deposit, freely transferable promissory notes and short-term government or corporate bonds in the interests of efficient management of the Trust's assets.

The transferable securities and other assets in which the Trust may invest will be principally quoted, or dealt in, on a Regulated Market, as set out in Schedule 1 of the Prospectus.

Sustainable Finance Disclosures

Pursuant to EU Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector, which is also known as the "Sustainable Finance Disclosure Regulation" (the **SFDR**), the Trust is required to disclose information on how it promotes environmental and social characteristics and ensures these commitments are met, the manner in which sustainability risks are integrated into the investment decision making process, and the results of the assessment of the likely impacts of sustainability risks on the returns of the Trust. The investment strategy of the Trust takes into account the promotion of certain environmental and social characteristics but does not have sustainable investment as its objective. Accordingly, the Investment Manager has categorised the Trust as meeting the requirements set out in Article 8(1) of the SFDR for products which promote environmental and social characteristics. Please refer to the Annex for further sustainable finance disclosures.

2. EFFICIENT PORTFOLIO MANAGEMENT AND FINANCIAL DERIVATIVE INSTRUMENTS

The Manager currently employs a risk management process relating to the use of FDIs on behalf of the Trust which details how it accurately measures, monitors and manages the various risks associated with FDIs. The Manager will on request provide supplementary information to Unitholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent

developments in the risk and yield characteristics of the main categories of investments in respect of the Trust. Any FDI not included in the risk management process will not be utilised until such time as a revised submission has been provided to the Central Bank.

The following is a description of the types of FDIs which may be used for efficient portfolio management purposes by the Trust:

Futures: Futures contracts are standardised, exchange-traded contracts between two parties to buy or sell a specified asset at an agreed upon price at a specified future date. The underlying reference asset can be a single asset, basket or index and contracts are marked-to-market daily, reducing counterparty risk.

The Trust may use futures contracts to hedge against market or price risk or allow it to gain exposure to the underlying equity market. The Trust may also use futures to equitise cash balances, both pending investment of a cash flow or with respect to fixed cash targets or alternatively to reduce financial exposures in an effort to reduce either absolute or relative position exposure. Frequently, using futures to achieve a particular strategy instead of using the underlying or related equity security results in lower transaction costs being incurred and less disruption to the underlying assets of a portfolio.

Forwards: A forward contract is a non-standardised, negotiated, over-the-counter contract between two parties to buy or sell an asset at a specified future time at a price agreed upon today. Most typically, the underlying assets are currencies, although forwards can be structured on other assets, baskets, indexes or reference securities. Forward contracts may be cash or physically settled between the parties and these contracts cannot be transferred.

The Trust's use of forward foreign exchange contracts may include altering the currency exposure of securities held, hedging against exchange risks, increasing exposure to a currency, shifting exposure to currency fluctuations from one currency to another and hedging classes denominated in a currency (other than the Base Currency) to the Base Currency. Other forward contracts, including equity, basket and index, could potentially be used to alter the currency, hedging against financial risks, or increase exposure to an asset.

Options: Option contracts give their holders the right, but not the obligation, to engage in a transaction on an asset, most typically to buy or sell a specific amount of a reference asset at or before a predetermined date at a pre-specified price. There are two basic forms of options: put options and call options. Put options are contracts that gives the buyer the right, but not the obligation, to sell to the seller of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. In return for granting the option the seller of the option collects a payment, or premium, from the buyer. Options may be cash or physically settled.

The Trust may use options in isolation, or in combination with equities, to more efficiently express a view in a given position, to generate income, or to protect financial risk of equities. If a price target is known, for example, and optionality is deemed expensive, a call option might be sold against that asset. If a security is deemed advantageous to a portfolio but considerable downside risk is seen by the portfolio manager, a long put position can be used against the long position to protect against short-term price risk. The Trust may be a seller or buyer of put and call options.

Swaps: A standard swap is an agreement between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time period, with the terms initially set so that the present value of the swap is zero. The Trust may enter into swaps, including, but not limited to, equity swaps, swaptions, interest rate swaps or currency swaps and other derivative instruments to hedge existing long positions. Swaps may extend over substantial periods of time, and typically call for the making of payments on a periodic basis. Swaptions are contracts whereby one party receives a fee in return for agreeing to enter into a forward swap at a predetermined fixed rate if some contingency event occurs (normally where future rates are set in relation to a fixed benchmark). Interest rate swaps involve the exchange by a Trust with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other. Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency. These agreements are used to transform the currency denomination of assets and liabilities. Unlike interest rate swaps, currency swaps must include an exchange of principal at maturity.

Calculation of Global Exposure

The Investment Manager uses a risk management technique known as value-at-risk (VaR) to measure the Trust's global exposure and to seek to ensure that the use of FDIs by the Trust is within regulatory limits. The Investment Manager will use the relative VaR measure. The relative VaR on the Trust's portfolio is calculated to ensure that it never exceeds two times that of the MSCI All Country World Index. VaR calculations will be carried out daily using a one tailed 99% confidence level for a holding period of 20 business days and a historical observation period of 250 business days.

Unit Class Currency Hedging

For the Currency Hedged Unit Classes, the Investment Manager will enter into swaps and/or currency forwards which aim to reduce the impact to investors in the Currency Hedged Unit Class of movements which may arise from changes in the exchange rate of the Unit class currency against the currencies of the Trust assets. Gains or losses and the costs relating to the derivative transactions will accrue solely in relation to the relevant Currency Hedged Unit Class. Over-hedged or under-hedged positions may arise due to external factors outside the control of the Investment Manager. Over-hedged positions will not exceed 105% of the Net Asset Value or the notional exposure (as appropriate) and under-hedged positions will not fall short of 95% of the portion of the Net Asset Value which is to be hedged against currency movements. Hedged positions will be kept under review to ensure over-hedged positions do not exceed the level permitted above and positions in excess of 100% of the Net Asset Value or the notional exposure (as appropriate) will not be carried forward from month to month. Currency Hedged Unit Classes will comply with the requirements of the Central Bank.

Leverage

The use of FDIs will result in the creation of leverage. The level of leverage (calculated as the sum of all the gross notionals of all FDIs) is not expected to be in excess of 200% of the Net Asset Value of the Trust under normal circumstances, but investors should note the possibility of higher leverage levels in certain circumstances.

3. INVESTMENT RESTRICTIONS

The general investment restrictions are set out under the heading "Investment Restrictions" in the Prospectus.

In addition, the following investment restrictions will apply to the Trust:

In order to be a target investment for other UCITS, the Trust will not invest more than 10% of its Net Asset Value in units or shares of other UCITS or other collective investment schemes.

4. BORROWING

In accordance with the general provisions set out in the Prospectus under the heading Borrowing and Lending Powers, the Trust may borrow up to 10% of its total Net Asset Value on a temporary basis and not for speculative purposes.

5. PROFILE OF A TYPICAL INVESTOR

Investment in the Trust is suitable for investors seeking income and long-term capital growth.

6. RISK FACTORS

The general risk factors set out in the "Risk Factors" section of the Prospectus apply to the Trust.

Unhedged Unit Classes

The Trust may issue classes denominated in a currency other than the Base Currency and accordingly the value of a Unitholder's investment in such a class may be affected favourably or unfavourably by fluctuations in the rates of two different currencies. For example, a Unitholder may not benefit if the class currency falls against the Base Currency and/or the currency in which the assets of the Trust are denominated.

Currency Hedged Unit Classes

In order to mitigate against the risk of movements in the currency of a Currency Hedged Unit Class against the currency of the Trust assets (where it is different to that of the relevant Currency Hedged Unit Class currency), the Investment Manager will enter into Unit class specific derivative transactions for the purposes of acquiring currency hedges for each Currency Hedged Unit Class. However, no assurance can be given that such hedging activities will be entirely effective in achieving the purpose for which they have been entered into. Currency hedging can also reduce and may completely offset gains in market circumstances that would otherwise have been beneficial had the position not been hedged. Consequently, the performance of a Currency Hedged Unit Class may differ from that of the Trust as a result of the currency hedging transactions.

7. DIVIDEND POLICY

The Directors may declare dividends semi-annually on or about 30 June and 31 December in each year to the Unitholders of the Income Units out of the profits of the Trust attributable to the Income Units, in accordance with the terms of the Prospectus.

The profits attributable to the Accumulating Units in the Trust shall be retained within the Trust and will be reflected in the value of the Accumulating Units.

Class Z Accumulation Units
Class Z EUR Accumulation Units
Class Z EUR Hedged Accumulation Units

(Accumulating Units)

Base Currency

Sterling

Where Unit classes are non-Sterling denominated, they may be either hedged or non-hedged. Currency Hedged Unit Classes seek to hedge the currency of the Trust's underlying assets against the currency of the relevant Currency Hedged Unit Class. Conversely, the non-hedged, non-Sterling denominated Unit classes simply reflect the value of the Base Currency as converted into the currency of the relevant Unit Class at the prevailing rate from time to time.

Initial Issue Price

The initial issue price in respect of the Class D EUR Accumulating Units and Class D EUR Hedged Accumulating Units will be €1.

Initial Offer Period

The initial offer period in respect of Class D EUR Accumulating Units and Class D EUR Hedged Accumulating Units will be from 9.00 a.m. (Irish time) on 22 July 2025 to 5.00 p.m. (Irish time) on 16 January 2026 or such shorter or longer period as the Manager may determine and notify to the Central Bank). After the Initial Offer Period, the Trust will be continuously open for subscriptions at each Dealing Day.

Business Day

Any day other than a Saturday or Sunday on which commercial banks are open for business in Dublin.

Dealing Day

The Dealing Days for the Trust will be each Business Day and such other Business Days(s) as the Manager may determine and notify in advance to Unitholders.

Dealing Deadline

In relation to applications for subscription or redemption of Units, 12 noon (Irish time) on the relevant Dealing Day although the Directors of the Manager in consultation with the Investment Manager may agree to waive the notice period at their discretion provided such applications are received before the Valuation Point for the relevant Dealing Day.

Valuation Point

The point in time by reference to which the Net Asset Value of the Trust is calculated which, unless otherwise specified by the Directors of the Manager in consultation with the Investment Manager (and notified in advance to Unitholders) with the approval of the Trustee, shall be 12 noon (Irish time) on the relevant Dealing Day.

Minimum Initial Investment Amount

Class A Income Units	£1,000
Class A Accumulating Units	£1,000
Class D Income Units	£5,000,000
Class D Accumulating Units	£5,000,000
Class D EUR Accumulating Units	€1,000
Class D EUR Hedged Accumulating Units	€1,000
Class F Income Units	£1,000
Class F Accumulating Units	£1,000
Class I Income Units	£1,000,000
Class I Accumulating Units	£1,000,000
Class P Income Units	£1,000
Class P Accumulating Units	£1,000

Class X Income Units	£1,000
Class X Accumulating Units	£1,000
Class Z Income Units	£1,000
Class Z Accumulating Units	£1,000
Class A EUR Income Units	€1,000
Class A EUR Accumulating Units	€1,000
Class I EUR Income Units	€1,000,000
Class I EUR Accumulating Units	€1,000,000
Class I EUR Hedged Accumulating Units	€1,000,000
Class I EUR Hedged Income Units	€1,000,000
Class V EUR Accumulating Units	€1,000
Class V EUR Accumulating Units	€1,000
Class X EUR Income Units	€1,000
Class X EUR Accumulating Units	€1,000
Class X EUR Hedged Accumulating Units	€1,000
Class X EUR Hedged Income Units	€1,000
Class Z EUR Accumulating Units	€1,000
Class Z EUR Hedged Accumulating Units	€1,000
Class Z EUR Income Units	€1,000
Class Z EUR Hedged Income Units	€1,000
Class A USD Income Units	\$1,000
Class A USD Accumulating Units	\$1,000

or its equivalent in the relevant currency or such lesser amounts as the Directors of the Manager may, in consultation with the Investment Manager, in their absolute discretion, decide.

In respect of Class A Units and Class F Units, as an alternative to investing in a lump sum, an investor may invest a minimum of £100 per month in the Trust. Investors subscribing in this manner may start or stop subscribing whenever they wish. There is no restriction on investors redeeming all or part of their Units in accordance with the terms of this Prospectus by virtue of these arrangements, neither is there any obligation or expectation that investors will elect to invest in this manner and accordingly, it is solely a matter of each investor's choice. Investors have the right at any time to cease making payments in accordance with this facility.

Please note that:

Class F Units may only be held by investors who are either an unadvised investor or an investor introduced by an Intermediary. Due to the nature of these Classes, no rebate of the Manager's initial or periodic charges, in the form of commission, will be payable. Investment in Class F Units may be accepted by the Manager at its discretion.

Class P Units may only be held by investors who subscribe through a Platform Service.

It is expected that the Platform Service will provide straight-through processing using industry-standard systems and that underlying client trades will be aggregated to provide bundled dealing. Due to the nature of these Classes, no rebate of the Manager's initial or periodic charges, in the form of commission, will be payable. Investment in Class P Units by other investors may be accepted by the Manager at its discretion.

Class X Units, Class X EUR, Class X EUR Hedged, Class D EUR Units, Class D EUR Hedged Units, Class Z, Class Z EUR, and Class Z EUR Hedged Units may only be held by investors who have a discretionary investment management arrangement with the Investment Manager or who are otherwise clients of the Investment Manager. Investment in Class X Units, Class X EUR, Class X EUR Hedged, Class D Units, Class Z, Class Z EUR, and Class Z EUR Hedged Units by other investors may be accepted by the Manager at its discretion.

Class V Units, hedged and unhedged, may only be held by investors who have a discretionary investment management arrangement with specific providers of independent advisory services or discretionary investment management services who have entered into an agreement with the Investment Manager. Investment in Class V Units by other investors may be accepted by the Manager at its discretion.

Preliminary Charge

No preliminary charge will be levied by the Manager in respect of any Class of Units of the Trust.

Issue Price

Following the close of the Initial Offer Period the Issue Price is the Net Asset Value per Unit.

To preserve the value of the underlying assets, the Manager may make a dilution adjustment to the Net Asset Value per Unit when there are significant net subscriptions which the Manager considers represents an appropriate figure to cover dealing costs and to preserve the value of the underlying assets of the Trust as set out in the section entitled “**Dilution Adjustment**” within the Prospectus. Any such charge will be retained for the benefit of the Trust and the Manager reserves the right to waive the application of a dilution adjustment at any time. The dilution adjustment may be waived where subscription/redemptions are settled in specie or where the Trust has sufficient cash to pay redemption proceeds from cash (rather than selling assets to raise the cash). Therefore the Trust would not incur costs and could waive the adjustment in specific instances.

Redemption Price

The redemption price is the Net Asset Value per Unit.

To preserve the value of the underlying assets, the Manager may make a dilution adjustment to the Net Asset Value per Unit when there are significant net redemptions which the Manager considers represents an appropriate figure to cover dealing costs and to preserve the value of the underlying assets of the Trust as set out in the section entitled “**Dilution Adjustment**” within the Prospectus. Any such charge shall be retained for the benefit of the Trust and the Manager reserves the right to waive the application of a dilution adjustment at any time. The dilution adjustment may be waived where subscription/redemptions are settled in specie or where the Trust has sufficient cash to pay redemption proceeds from cash (rather than selling assets to raise the cash). Therefore the Trust would not incur costs and could waive the adjustment in specific instances.

Settlement Date

In respect of receipt of monies for subscription for Units, the Settlement Date shall be three Business Days following the relevant Dealing Day and in respect of dispatch of monies for the redemption of Units, the Settlement Date shall normally be three Business Days following the relevant Dealing Day.

Minimum Net Asset Value

£5,000,000, subject to the discretion of the Manager.

9. CHARGES AND EXPENSES

Fees of the Investment Manager

The Investment Manager will be entitled to receive an annual fee, payable by the Manager, out of the assets of the Trust as follows:

Class	% of Net Asset Value (plus VAT if any)
Class A Income Units	1.50%
Class A Accumulating Units	1.50%
Class D Income Units	0.50%
Class D Accumulating Units	0.50%
Class F Income Units	1.00%
Class F Accumulating Units	1.00%
Class I Income Units	0.85%
Class I Accumulating Units	0.85%
Class P Income Units	0.75%
Class P Accumulating Units	0.75%
Class X Income Units	1.35%
Class X Accumulating Units	1.35%
Class Z Income Units	0.00%
Class Z Accumulating Units	0.00%
Class A EUR Income Units	1.50%
Class A EUR Accumulating Units	1.50%
Class D EUR Accumulating Units	0.50%
Class D EUR Hedged Accumulating Units	0.50%
Class I EUR Income Units	0.85%
Class I EUR Accumulating Units	0.85%
Class I EUR Hedged Income Units	0.85%
Class I EUR Hedged Accumulating Units	0.85%
Class V EUR Accumulating Units	0.40%
Class V EUR Hedged Accumulating Units	0.40%
Class X EUR Income Units	1.35%
Class X EUR Accumulating Units	1.35%
Class X EUR Hedged Income Units	1.35%
Class X EUR Hedged Accumulating Units	1.35%
Class Z EUR Accumulating Units	0.00%
Class Z EUR Income Units	0.00%
Class Z EUR Hedged Income Units	0.00%
Class Z EUR Hedged Accumulating Units	0.00%
Class A USD Income Units	1.50%
Class A USD Accumulating Units	1.50%

Such fee shall be calculated on the last Business Day in each period of one month, shall accrue daily and shall be payable on the ninetieth day after receipt of a correct invoice. The Investment Manager shall also be entitled to be reimbursed out of the assets of the Trust for all reasonable out-of-pocket expenses.

Expenses may be charged to the capital of the Trust so that a higher than market average distribution of income can be achieved. This may have the effect of lowering the capital value of a Unitholder's investment by forgoing the potential for future capital growth.

Fees of the Manager, the Trustee and the Administrator

The Manager will be entitled to receive out of the assets of the Trust an annual fee (the “**Fixed Rate Operating Charge**”) from which it will discharge certain fees and expenses, as disclosed in the Prospectus. The Fixed Rate Operating Charge will be levied on a tiered basis, with the applicable rates being dependent on the level of the Trust's Net Asset Value. The thresholds applicable to the Fixed Rate Operating Charge in respect of the Trust are as follows:

Class	% of Net Asset Value on the Trust's Net Assets between £0 - £300,000,000 (Tier 1)	% of Net Asset Value on the Trust's Net Assets between £300,000,000 - £600,000,000 (Tier 2)	% of Net Asset Value on the Trust's Net Assets over £600,000,000 (Tier 3)
Class A Income Units	0.25%	0.20%	0.15%
Class A Accumulating Units	0.25%	0.20%	0.15%
Class D Income Units	0.15%	0.15%	0.15%
Class D Accumulating Units	0.15%	0.15%	0.15%
Class F Income Units	0.25%	0.20%	0.15%
Class F Accumulating Units	0.25%	0.20%	0.15%
Class I Income Units	0.15%	0.10%	0.05%
Class I Accumulating Units	0.15%	0.10%	0.05%
Class P Income Units	0.25%	0.20%	0.15%
Class P Accumulating Units	0.25%	0.20%	0.15%
Class X Income Units	0.25%	0.25%	0.25%
Class X Accumulating Units	0.25%	0.25%	0.25%
Class Z Income Units	0.18%	0.18%	0.18%
Class Z Accumulating Units	0.18%	0.18%	0.18%
Class A EUR Income Units	0.25%	0.20%	0.15%
Class A EUR Accumulating Units	0.25%	0.20%	0.15%
Class D EUR Accumulating Units	0.15%	0.15%	0.15%
Class D EUR Hedged Accumulating Units	0.15%	0.15%	0.15%
Class I EUR Income Units	0.15%	0.10%	0.05%
Class I EUR Accumulating Units	0.15%	0.10%	0.05%
Class I EUR Hedged Income Units	0.15%	0.10%	0.05%
Class I EUR Hedged Accumulating Units	0.15%	0.10%	0.05%
Class V EUR Accumulating Units	0.15%	0.15%	0.15%
Class V EUR Hedged Accumulating Units	0.15%	0.15%	0.15%
Class X EUR Income Units	0.25%	0.25%	0.25%
Class X EUR Accumulating Units	0.25%	0.25%	0.25%
Class X EUR Hedged Income Units	0.25%	0.25%	0.25%
Class X EUR Hedged Accumulating Units	0.25%	0.25%	0.25%
Class Z EUR Accumulating Units	0.18%	0.18%	0.18%
Class Z EUR Income Units	0.18%	0.18%	0.18%
Class Z EUR Hedged Income Units	0.18%	0.18%	0.18%
Class Z EUR Hedged Accumulating Units	0.18%	0.18%	0.18%
Class A USD Income Units	0.25%	0.20%	0.15%
Class A USD Accumulating Units	0.25%	0.20%	0.15%

The tiered rates will be applied to each unit class according to the proportions to which they relate to the Trust's Net Asset Value.

ANNEX

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sarasin IE Global Equity Opportunities (GBP)

Legal entity identifier: 5493009PLLCGHLDMEEO9

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ ☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This financial product encourages the improvement of environmental and social behaviours of investee companies (and other investee entities e.g. corporate bond issuers). It promotes changes in the activities of companies through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

Engagement strategies may be company-specific or follow an identified theme: for example, the product is managed in line with the climate change mitigation goal to limit global warming to 1.5oC above pre-industrial levels through reductions in emissions of greenhouse gases (GHG), consistent with net zero emissions by 2050.

The Investment Manager makes its own assessment of the environmental and/or social impacts caused by each investee entity, using a variety of inputs. Environmental assessments may include: climate change; use of materials, waste and failure to recycle (circular economy); land and biodiversity damage; water and ocean pollution and mismanagement; air pollution and particulates. Social assessments may include: diversity, working conditions, forced labour and discrimination in the supply chain; employee contracts and treatment; customer harms; bribery and corruption; unfair social contribution and broader adverse societal impacts such as poor tax behaviour.

A reference benchmark has not been designated for the purpose of attaining the environmental or social characteristics promoted by this Trust.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability impacts for each investment are measured by the Investment Manager's proprietary Sarasin's Sustainable Impact Matrix (SIM).

Among the quantitative indicators considered within the SIM, the Investment Manager measures the negative effects of companies included in the portfolio as the result of its investment decisions. These negative principal adverse impacts or PAIs include environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters in accordance with SFDR. More specifically, the Investment Manager measures prescribed metrics known as sustainability indicators in accordance with the SFDR methodology (PAI Scores). By tracking changes in PAI Scores over time, the Investment Manager gathers evidence of improvements in environmental and/or social performance associated with the Trust's investee companies.

Attainment of reductions in adverse environmental and social impacts is judged in terms of the real-world changes in the activities of investee companies as distinct from change achieved by altering the composition of the Trust's investment portfolio. Indicators, therefore, separate the underlying change in an adverse impact caused by a change in an investee entity's behaviour from the change caused by transactions that may, for instance, reduce the Trust's holding in an investee entity that has high PAI Scores.

Alongside monitoring changes in PAI Scores, the Investment Manager seeks to track how its engagements are responsible for these improvements by recording all substantive interactions with the underlying investee entity and the associated impacts.

The SFDR Principal Adverse Impact Report for this product and the Investment Manager's engagement report will be made available on the Investment Manager's website.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The Trust does not intend to make sustainable investments as defined by SFDR.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Trust does not intend to make sustainable investments as defined by SFDR.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Adverse impacts, including PAIs, on sustainability factors are taken into account using the SIM, as outlined above.

Where, on the basis of PAI scores, an investee entity is deemed to be performing poorly, these impacts will be considered in investment analysis and also inform the Investment Manager's engagement and voting activities with investee entities. If there is no improvement in an indicator over a reasonable time period, depending on specific circumstances, the investment is likely to be sold.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Trust does not intend to make sustainable investments as defined by SFDR.

The SIM however, takes account of the OECD Guidelines on Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Yes, principal adverse impacts (PAIs) are considered as part of the SIM for each investment. PAIs may then be addressed through engagement and voting activities intended to drive improvements and reductions in the principal adverse impacts of the companies in which the Trust invests.

The SFDR Principal Adverse Impact Report for this Trust, and the Investment Manager's engagement report, will be made available on the Investment Manager's website.

Further information on how the Trust considered PAIs will also be provided in the Annual Report.

No

What investment strategy does this financial product follow?

The Trust seeks to achieve its investment objective through investment in a broad portfolio of international equity securities using a combination of top-down and bottom-up analysis to seek to identify the best themed stocks and hold them in the portfolio to add long term value. Environmental and social characteristics are promoted through engagement with the board of directors and management and through engagement with policymakers in respect of regulation.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Trust's investment strategy follows a strict process, throughout which ESG considerations are integrated. The Investment Manager's investment process embeds two major ESG considerations.

The first major element of the investment strategy used to select the investments to attain each of the environmental or social characteristics is analysis of the significant unsustainable activities of the entity, identified using the SIM.

The second major element is the engagement and voting strategy to encourage the entity to transition to a more sustainable approach. Timescales for transition vary but, for example where the investee entity is classified as having a high climate risk and lacks an explicit commitment and credible transition plan, the Investment Manager will engage to support the entity in adopting a net zero-aligned strategy. Entities that fail to transition create significant financial risk for shareholders and their holdings in the Trust may ultimately be sold by the Investment Manager.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no commitment to reduce the scope of the investments by a minimum rate.

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager assesses the governance practices of investee companies, including sound management structures, employee relations, remuneration of staff and tax compliance. A wide variety of factors are considered in the SIM to make the assessment of overall governance practices. The policy of the trust is to address governance practices of concern through engagement. The Investment Manager's Corporate Governance and Voting Policy, which is available on the Investment Manager's website, sets out detailed expectations for investee company governance practices. If poor practices are not addressed through engagement, the Investment Manager will vote against the investee company's management on relevant resolutions. These actions are normally sufficient to address poor governance practices but failure to discuss, address or resolve significant externalities may lead to disposal.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments of the Trust that are aligned with the environmental and social characteristics promoted by the Trust is at least 80% (#1 Aligned with E/S characteristics) which do not qualify as sustainable investments. Up to 20% of the investments of the Trust may therefore not be aligned with these characteristics (#2 Other). Government bonds, cash, derivatives and some investments on other funds are included under #2 Other.

Asset allocation
describes the share
of investments in
specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives are not currently used to attain the environmental or social characteristics promoted by the Trust.

● **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Trust does not intend to make sustainable investments as defined by SFDR and it does not commit to a specific level of alignment with the EU Taxonomy (0% minimum).

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

There is no minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Trust does not intend to make sustainable investments as defined by SFDR. There is therefore no minimum share of investments with an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Trust does not intend to make sustainable investments as defined by SFDR. There is therefore no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The Trust's investments in government bonds, cash, derivatives and in some other funds are included under “#2 Other”. Such investments may be used to hedge risks or gain exposure to a broader range of investments. The Trust promotes E/S characteristics through analysis of

the significant unsustainable activities of the entity, identified using the SIM, and through its engagement and voting strategy to encourage the entity to a more sustainable approach. The Investment Manager does engage with government policymakers in respect of specific issues, but believes it cannot currently influence governments to a sufficient extent to achieve engagement impacts across many E/S factors. Therefore, government bonds are included in “#2 Other”.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Trust has not designated a reference benchmark for the purposes of attaining the environmental characteristics which the Trust seeks to promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable.

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

Reference benchmarks
are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
